

WASHINGTON STATE PATROL
WSP

The Washington State Department of Transportation maintains a statewide database for all reported traffic collisions, beginning with collisions occurring in 2002. In addition, collision data for interstate and state highways only is available for collisions occurring from 1993 to the present. This data includes such items as collision location, date, time, severity, weather and light conditions, as well as information on drivers, pedestrians, bicyclists and property owners involved in collisions.

Federal highway safety laws require the state to create this collision database for use in obtaining federal safety improvement funds. Under Section 409 of Title 23 of the United States Code, collision data is prohibited from use in any litigation against state, tribal or local government that involves the location(s) mentioned in the collision data. By checking the box below, you agree to comply with these terms - failure to do so will be grounds for denying your request.

☐ I hereby affirm that I am not requesting this collision data for use in any current, pending or anticipated litigation against state, tribal or local government involving a collision at the location(s) mentioned in the data.

Last Name		First Name		MI
Company/Agency Name				
Address				
City			State	Zip Code
Phone No.	Fax No.		Email	

Use the space below to describe your request. If applicable, please include the following:

- Beginning and ending dates for the desired data.
- Names of locations or individual highways, roads or streets desired.
- In what format you would like the data, e.g., a history report that gives information about each collision; a summary report by year or by month; or a summary for specific data elements, such as light conditions, that were experienced during the collisions.
